Certificate of Completion

This document certifies that the person has sucessfully completed the following module:

Mobile Applications

The Mobile Development module emphasises the creation of applications for both Android and iOS using Flutter, Google's comprehensive UI toolkit. Utilizing the Dart programming language, which offers a declarative layout, the module explored a wide array of topics ranging from foundational Dart concepts and OOP principles to nuanced aspects of Flutter, such as state management, application flow, and hardware integrations. Various packages, including state management tools like Provider and Flutter Bloc, database solutions like sqflite and Firebase, and others like image_picker and google_maps_flutter, were also highlighted.
